The St. Louis Centers for Advanced Professional Studies (CAPS) will hold an informational session for parents and students considering enrolling in courses next school year. Attendees will hear from St. Louis CAPS staff and students. The event will include a panel discussion with current St. Louis CAPS students as well as former graduates currently in college. St. Louis CAPS provides juniors and seniors the opportunity to fast-forward beyond college and test-drive their future in high-skill, high-demand professions.

St. Louis CAPS is part of the National CAPS Network that spans 12 states and 80+ programs. There are currently 8 local school districts that comprise the St. Louis CAPS partnership (Affton, Bayless, Fox, Kirkwood, Lindbergh, Mehlville, Rockwood, and Webster Groves). St. Louis CAPS offers four courses eligible for high school and college credit as well as college scholarships. Each course is offered during the school day and immerses students in the real-world for an entire school year. All course experiences occur outside the walls of a traditional high school classroom. Students will learn directly from business and industry professionals by completing projects, job shadows, and internships in spaces such as hospitals, business incubators, research labs, engineering industries, technology companies, and college campuses.

College Credit Options: Missouri S & T, Lindenwood University, & St. Louis Community College

College Scholarship Options: William Jewell College and University of Northern Iowa

Post-Secondary Endorsements: yourcapsnetwork.org/post-secondary-endorsements/
